

## 2022 Population Needs Assessment

---

Alameda Alliance for Health develops a Population Needs Assessment (PNA) with the goal of improving health outcomes and ensuring that the Alliance and its provider partners are meeting the needs of all its Medi-Cal members.

The PNA identifies member health needs and health disparities from data about the membership, health status and disease prevalence, access to care, and quality of care.

You can find the 2022 Alliance Population Needs Assessment report at:  
**[alamedaalliance.org/providers/quality](https://alamedaalliance.org/providers/quality)**

From the review of the data and input from the Alliance Member Advisory Committee, we create an action plan to address gaps in care. For 2022 – 2023 Alliance Quality Improvement PNA priorities are:

- 1. Chronic disease self-management support:**
  - a. Controlling high blood pressure, ages 18 to 85
  - b. Adults with diabetes, ages 19 and older
  
- 2. Increase access and participation in preventive care:**
  - a. Child well-child visits, ages 0 to 30 months
  - b. Breast cancer screening in Black (African American) women, ages 52 to 74

We are seeking opportunities to partner with providers and community organizations to address these health needs and disparities and meet our shared goals of improving health.

For questions about the PNA or to express interest in collaborating, please reach out to Linda Ayala, Health Education Manager, at **[layala@alamedaalliance.org](mailto:layala@alamedaalliance.org)**.
