ALAMEDA ALLIANCE FOR HEALTH
GROUP CARE MEDICATION FORMULARY

September 2025

Overview

At Alameda Alliance for Health (Alliance), we are here to help you. As your partner in health, we have put together this **Alliance Group Care Medication Formulary** that contains a complete list of covered and preferred outpatient prescription drugs for Alliance Group Care members. The Alliance reviews the list at least four (4) times a year and updates the formulary monthly.

This printable list may not reflect the latest updates. The formulary is subject to change and all previous versions of the formulary are no longer in effect. For the most up-to-date Medication Formulary, or to print the most current list, please visit the Alliance website at **www.alamedaalliance.org/members/pharmacy-and-medication-benefits/medication-formulary**.

To view the Alliance Group Care Member Handbook also known as the Combined Evidence of Coverage (EOC) and Disclosure Form, please visit the Alliance website at **www.alamedaalliance.org/members/group-care/benefits-and-covered-services**.

Alameda IHSS Formulary TOC-1

How to Use the Medication Formulary

To find a medication on the Medication Formulary, first search for what the medication will treat. All medications will be listed by their generic and brand names in their therapeutic category, class, and in alphabetical order.

Any medication not found in this list is a non-formulary medication. If a generic equivalent for a brand-name drug is not available or is not covered, the medication will not be separately listed by its generic name. This Medication Formulary applies only to outpatient medication prescribed to Alliance members. It does not apply to medication used in inpatient settings.

Please Note: A medication and a drug may be used interchangeably as they have the same definition.

Description of Coverage

The Alliance covers outpatient prescription drugs, devices, and Food and Drug Administration (FDA)-approved products for preventative, contraceptive, and diabetes care through our retail and/or specialty pharmacies.

Please Note: The Alliance covers products and drugs used with medically necessary that may include, but are not limited to:

- disposable devices that are medically necessary for the administration of covered prescription drug, such as spacers and inhalers, syringes for self-injection that are not dispensed in pre-filled syringes, over the counter drugs, and diabetic testing supplies (e.g. test strips, lancets, and pens).
- various FDA-approved prescription contraceptives (e.g. oral contraceptives, emergency contraceptives, rings, patches, cervical caps, and diaphragms) and other FDA-approved products.

- folic acid supplements that can be used for pregnant women and tobacco cessation drugs/products.

If a covered contraceptive drug/device, outpatient prescription drugs, and Food and Drug Administration (FDA)-approved products for preventative, contraceptive, and/or diabetes care is unavailable or not medically recommended by your provider, you can ask your doctor to submit the Prescription Drug Prior Authorization (PA) Form for a non-covered contraceptive/device/drugs/products as prescribed.

Words to Know

Coverage Document – A health plan contract, evidence of coverage, certificate of coverage, schedule of benefits, or any other contract for health coverage between an enrollee or subscriber and health plan.

Dosage Form - The physical form in which a prescription drug is produced and dispensed, such as a tablet, a capsule, or an injectable.

Established name - The official nonproprietary name for a prescription drug.

Product - A discrete package of health care coverage benefits that a health plan offers for a particular policy with a specific network service area.

Strength - The amount of active ingredient or ingredients present in each dose of a prescription drug.

Brand Name Drug– A medication that is marketed under a proprietary, trademark-protected name. The brand name drug is listed in all CAPITAL letters.

Generic Drug– The same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic medication is listed in ***bold and italicized lowercase*** letters in the medication formulary.

Drug Tier - A group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.

Drugs are placed into drug tiers based on defined categories. The amount you pay for drugs in different tiers will vary. You can also find information about what you pay by drug tier in the *Summary of Benefits* of the AAH *Evidence of Coverage (EOC)*.

Drug Tier	Description
1	Most generic drugs and low-cost, preferred brand drugs
2	Non-preferred generic drugs, preferred brand drugs, or drugs recommended by the P&T Committee based on drug safety, efficacy, and cost

Generic Substitutions – The health plan has a mandatory generic program which means that if a generic medication is added on the formulary its brand name is not covered. This program promotes the use of generic over brand-name options, when medically appropriate. When your prescribing doctor writes you a prescription for a brand-name medication, they must submit a Prescription Drug Prior Authorization (PA) Request Form. The health plan will review the request and will inform the doctor of the decision within **one (1) business day**.

Please Note: Formulary drugs are in a categorical list that reflects the following:

1. An alphabetical complete list of all covered prescription drugs listed by its brand and generic names in the therapeutic category and class to which it belongs. Category names shall appear alphabetically within those categories.
2. The generic name of a brand-name drug is included after the brand name in parenthesis and all ***bold and italicized lowercase*** letters.
3. If the generic equivalent for a brand-name drug is available, and both the brand name and generic equivalents are covered, the generic drug will be listed separately from the brand-name drug in all ***bold and italicized lowercase*** letters.
4. If a generic equivalent for a brand name drug is not available or is not covered, the drug will not be separately listed by its generic name.
5. In the event a generic drug is marketed under a proprietary, trademark-protected brand name, the brand name will be listed in all CAPITAL letters after the generic name in parentheses and in a regular typeface with the first letter of each word capitalized.
6. Organized by drug category and class based on the most current version of the U.S. Pharmacopeial Convention (USP) drug classification system.
7. Prescription drugs belonging to multiple drug classes shall be listed in each applicable class.
8. Brand name and generic prescription drugs shall be alphabetically listed by respective brand or established name within classes. In addition to a category and class name provided by the drug classification system, the categorical list shall include, where possible, a plain language description of the category and class.
9. Columns from left to right with "Prescription Drug Name", "Drug Tier", and "Coverage Requirements and Limits" with legend will be on each page. The column headings shall appear on the top of each page.

Example of generic and brand: Phosphodiesterase Type 5 Inhibitors

Prescription Drug Name	Drug Tier	Coverage Requirements and Limits
tadalafil (pah) oral tablet 20 mg	T1	PA; SP (Drug may require distribution through a specialty pharmacy or is a limited distribution drug); AL (Min 21 Years)
TADLIQ ORAL SUSPENSION 20 MG/5ML (***tadalafil (pah)***)	T2	PA; SP (Drug may require distribution through a specialty pharmacy or is a limited distribution drug.)

From the above example:

Generic Drug:

- ***tadalafil (pah) oral tablet***

Brand Name Drug:

- TADLIQ ORAL SUSPENSION

Coinsurance – A percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

Copayment – A fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

Deductible – The amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.

Enrollee – A person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this formulary template shall also include subscribers as defined in this section below.

Exception Request – A request for coverage of a prescription drug. If an enrollee, their designee, or prescribing doctor submits an exception request for coverage of a prescription drug, the health plan must cover the prescription drug when it is determined to be medically necessary to treat the enrollee's condition.

Exigent Circumstances – When an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health or ability to regain maximum function, or when an enrollee is undergoing a current course of treatment using a non-formulary medication. Exigent circumstances and requests will be treated as urgent and will follow the same timelines as urgent requests.

Formulary - The complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list,

Intravenous Solutions of Other Unlisted Medication – Dispensing following inpatient discharge from an acute care hospital, when IV therapy with the same medication was started before discharge. Quantity and day supply limitations may apply.

Please Note: Non-compounded products must be billed using the product's National Drug Code (NDC) number. Compounded solutions must be billed as a compound claim.

Intravenous Solutions of Unlisted Antibiotics – Dispensing following inpatient discharge from an acute care hospital, when IV therapy with the same antibiotic was started before discharge. Quantity and day supply limitations may apply.

Please Note: Non-compounded products must be billed using the product's National Drug Code (NDC) number. Compounded solutions must be billed as a compound claim.

Medication Coverage Requirements or Limits – A health plan may request an omission, deviation or substitution of the stated definitions to the Medical Director for review and approval. There are some processes and limits that may apply to medications in the formulary.

Reviews may be marked with a code as seen on the list below:

ICON	CODE	MEANING	DEFINITION
N/A	DY	Day	A type of duration
N/A	EA	Each	Items used separately
N/A	GM	Gram	A mass unit of measurement
N/A	INH	Inhaler	Medication formulation type
N/A	MAX	Maximum	The largest amount possible
N/A	MIN	Minimum	The smallest needed amount
N/A	ML	Milliliter	A liquid unit of measurement
N/A	QTY	Quantity	An amount of a given product
PA Prior Auth	PA	Prior authorization	Requires specific request process
QL Quantity Limit	QL	Quantity limit	Coverage may be limited to specific quantities per prescription and/or time period
90DS 90 Day Supply	90DS	90 Day Supply	Medication can be dispensed up to a 90-day supply
SP Specialty	SP	Specialty products	Products that may need particular care
ST Step Therapy	ST	Step therapy	Coverage may depend on previous use of another drug
T1	T1	Tier 1	Formulary generic drugs
T2	T2	Tier 2	Formulary brand drugs
AL Age Limit	AL	Age Limit	Limits to covered drugs based on age
	NF	Non-Formulary	Non-covered/unlisted drugs
G	N/A	Generic Indicator	Generics have the same drug as the brand name drug
	N/A	Prescriber Note	Click this symbol for more information

Medication Tier – A group of prescription drug that correspond to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost.

Out-of-Pocket Cost – Copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

Please Note: Types of tiers on the Alliance formulary include – Tier 1 (generic medications) and Tier 2 (brand medications). Tier 1 medications have a $10 copayment for a **30-day** supply and Tier 2 medications have a $15 copayment for a 30-day supply. The Alliance has a mandatory generic medication program that promotes the use of generic over brand-name options. When a formulary medication is available in tier 1 and tier 2, tier 1 generic medications are generally preferred.

Please Note: Oral anti-cancer drugs subject to cost sharing limits will not exceed $250 for a 30-day supply.

Nonformulary drug – A prescription drug that is not listed on the health plan's medication formulary. A non-formulary drug is also any prescription drug where an enrollee's copayment or out-of-pocket costs are different than the copayment or out-of-pocket costs for a formulary prescription drug, except as otherwise provided by law or regulation.

These medications are reserved for members who:

- Have used (or cannot/should not use) up to **two (2)** formulary alternatives that are used to treat the documented diagnosis; OR
- Meet off-label criteria; OR

Have tried and failed or are unable to use separate components (or therapeutic equivalents) of a combination medication or are unable to use a consolidated dose form. Each outpatient prescription request will be reviewed via a prior authorization (PA) exception request within **24** (for urgent requests) to **72 hours** (for non-urgent requests) from the time received. Coverage determination documents will be sent to the enrollee (or their designee) and the enrollee's prescribing provider within this time based on urgent or non-urgent status. Coverage determination documents will include information on appeal rights, procedures, and duration of coverage. If the plan fails to respond to a completed prior authorization exception request within **24** (for urgent requests) to **72 hours** (for non-urgent requests), then the request will be approved.

Please Note: Non-formulary medication will also be covered when determined to be medically necessary (e.g., once reviewed with a PA request). The enrollee may file a grievance, appeal, or complaint for a denial of coverage (this information is in the coverage determination documents in the appeal rights and procedures).

Duration of Coverage – When a formulary exception request is approved, there is an approval window that limits the length of time an authorization can be used (e.g., for the duration of the prescription, including refills). Coverage determination documents with this information are sent to the enrollee or their designee and the enrollee's prescribing provider. The Alliance will provide coverage, including refills, pursuant to a request based on exigent circumstances for the duration of the exigency. An enrollee may file a grievance or complaint, relating to denial of a coverage request. Information on appeal rights and procedures are also available in the denial coverage documents.

Prescribing Provider – A health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.

Prescription - An oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.

Please Note: The presence of a prescription drug on the formulary does not guarantee the enrollee will be prescribed that prescription drug by their prescribing doctor for a particular medication condition.

Prescription drug or drug– A drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law. A prescription drug or drug is also a drug approved by the federal Food and Drug Administration (FDA) for sale to consumers that requires a prescription and is not provided for use on an inpatient basis.

Please Note: A medication and a drug may be used interchangeably as they have the same definition.

Prior Authorization (PA) –A health plan's requirement that the enrollee or the enrollee's prescribing provider get the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization (PA), when medically necessary for the enrollee to get the drug.

Prior Authorization (PA) Exception Process – The prescribing doctor may submit a Prescription Drug Prior Authorization (PA) Request to request a medication that is not on the Medication Formulary or has restrictions. Restrictions may occur when the quantity of medication prescribed is more than the plan allows or if a medication has Step Therapy (ST) requirements. A Medication Review Guideline (also known as criteria) has been developed for these medications and will be referenced upon receipt of the doctor's request. The health plan will review the request and will inform the prescribing provider of the decision within **24** (for urgent requests) to **72 hours** (for non-urgent requests) from the time received. If the plan fails to respond to a completed prior authorization request within **24** (for urgent requests) to **72 hours**

(for non-urgent requests), then the request will be approved. The Alliance shall allow continuation of therapy for members using medically necessary drugs, this also includes refills for the duration of the prescription.

Please Note: The health plan has customer service representatives readily available during normal business hours to provide accurate, specific information concerning prescription drug benefits, including but not limited to: information concerning drugs covered under the medical benefit of the enrollee's contract; the actual dollar amount of cost sharing under the enrollee's contract for drugs subject to a copayment or coinsurance; and the process for submitting an exception request and requesting prior authorization and step therapy exceptions.

Alliance Member Services Department
Monday – Friday, 8 am – 5 pm
Phone Number: **1.510.747.4567**
Toll-Free: **1.877.932.2738**
People with hearing and speaking impairments (CRS/TTY): **711/1.800.735.2929**

Quantity Limit (QL) – A restriction on the number of doses or any other limitations on the quantity of a prescription drug a health plan will cover during a specific time period. For certain medications, the health plan has a limit on the number of pills that can be covered. In general, a **30-day** supply is covered. If you require a medication that exceeds the limit, the prescribing doctor can submit a Prescription Drug Prior Authorization (PA) Request. The health plan will review the request and will inform the prescribing provider of the decision with**in 24** (for urgent requests) to **72 hours** (for non-urgent requests) from the time received.

Step therapy (ST) - A process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.

Step Therapy (ST) Exception Process – In some cases, the health plan may require you to try a certain medication before a different medication is covered. The prescribing provider can request an exception by submitting a Prescription Drug Prior Authorization (PA) Request. The health plan will review the request and will inform the prescribing provider of the decision within **24** (for urgent requests) to **72 hours** (for non-urgent requests) from the time received. If the plan fails to respond to a completed step therapy exception request within **24** (for urgent requests) to **72 hours** (for non-urgent requests), then the request will be approved. The Alliance shall allow continuation of therapy for members using medically necessary drugs, this also includes refills for the duration of the prescription.

Please Note: The Alliance reviews the list at least four (4) times a year and will update the formulary with any changes on a monthly basis. These changes will be effective on the 1st day of the month. The types of formulary changes may relate to quantity limits, step therapy requirements, changes in drug or dosage form, changes in tier placement of a drug that results in an increase or decrease in cost sharing, and changes of utilization management restrictions, including any additions of these restrictions. These changes are posted on the health plan website.

Please visit the Alliance website at www.alamedaalliance.org/members/pharmacy-and-medication-benefits/medication-formulary/**Subscriber** – The person who is responsible for payment to the health plan or whose employment or other status, except for family dependency, is the basis for eligibility for membership in the plan.

Therapeutic Interchange – The health plan may use Therapeutic Interchange to promote rational pharmaceutical therapy when evidence suggests that outcomes can be improved by substituting a medication that is therapeutically equivalent but chemically different from the prescribed medication.

Therapeutic Interchange protocols are never automatic; a dispensing provider may not substitute a therapeutically equivalent alternative medication for the prescribed medication without the knowledge and authorization of the prescribing doctor.

Previously Plan Approved Medications – If the plan has previously approved drug coverage for an enrollee condition that a provider continues to appropriately prescribe in a safe and effective manner, then the plan will not limit or exclude continued coverage.

Authorization and Billing Instructions

The Alliance provides coverage for drugs administered in the provider's office, this is part of the medical benefit. If you have any questions on how your doctor can submit a prior authorization for them please call Member Services see page xiii for contact information. Providers with more questions can call Providers Services see xiii for contact information.

Providers can supply in-office injectable medication to Alliance members by purchasing directly from suppliers/manufacturers (commonly known as buy and bill) or PerformSpecialty. Your doctor can submit a medication prior authorization request form to obtain coverage for drugs dispensed in office as a medical benefit. The authorization and billing processes differ based on the method of obtaining the medication and the member's delegate:

METHOD OF PROCUREMENT	DELEGATE	REQUIRES AUTHORIZATION	WHERE TO SUBMIT THE AUTHORIZATION	WHOM TO BILL

PerformSpecialty (Pharmacy Benefit)	All	Yes	PerformRx	Not necessary (Pharmacy bills the Alliance directly)
Buy and Bill (Medical Benefit)	Alliance	Please refer to the list below for the Alliance delegate or check with the member's delegate.	Alliance	Alliance
	Children First Medical Group (CFMG)		Children First Medical Group (CFMG)	
	Community Health Center Network (CHCN)		Community Health Center Network (CHCN)	

Please use the corresponding authorization form for the type of request:

- Medical Benefit:
  - Alliance Prescription Drug Prior Authorization (PA) Request form
- Pharmacy Benefit:
  - PerformRx Medication Request Form (Alliance Group Care)
  - Request for Medicare Prescription Drug Coverage Determination (Medicare)

Please Note: Drugs covered under the Medical Benefit are medications that are given at a provider's office or clinic, while drugs covered under the Pharmacy Benefit (outpatient prescription drugs) are received at a retail or specialty pharmacy.

Filling Your Prescription at a Network Retail Pharmacy

In most cases, you can fill prescriptions at any network retail pharmacy, except for prescriptions for a specialty drug. To find a network retail pharmacy, please use the Alliance Provider Directory, or visit the Alliance website at **www.alamedaalliance.org/help/find-a-pharmacy**.

You can also call:

Alliance Member Services Department
Monday – Friday, 8 am – 5 pm
Phone Number: **1.510.747.4567**
Toll-Free: **1.877.932.2738**
People with hearing and speaking impairments (CRS/TTY): **711/1.800.735.2929**

PerformSpecialty Pharmacy

PerformSpecialty is the Alliance specialty pharmacy for and Alliance Group Care members. Retail pharmacies may not dispense specialty medication for Alliance Group Care members.

Please refer to the attached Medication Formulary list of available medication from PerformSpecialty. Certain medications are only available from specific distributors and not PerformSpecialty. The clinic can purchase these medication directly from the distributors and bill the Alliance or have the distributor bill the Alliance. These medication, along with the name and contact of the alternate distributors, are listed on the Limited Distribution Drug List.

Prior authorization (PA) is required for new specialty medication orders and for renewals (usually annually). The same review process is used for specialty medication orders as is used for other retail medications that require a PA.

Prior Authorization (PA) process for PerformSpecialty:

- The prescribing doctor will fax the appropriate medication request form to PerformRX (please see above).
- The Alliance will process requests within **24 to 72 hours** from the time received.
- A notification of the decision will be sent to the doctor's office/clinic and PerformSpecialty.
- Upon approval by PerformRx, PerformSpecialty will call the doctor's office/clinic to obtain the prescription and dispense the medication by mail.

Contacts for Additional Information

For provider questions:

TRINTELLIX ORAL TABLET 10 MG, 20 MG, 5 MG (***vortioxetine hbr***)	T2	PA
Succinimides		
ethosuximide oral capsule 250 mg	T1	
ethosuximide oral solution 250 mg/5ml	T1	
Thioxanthenes		
thiothixene oral capsule 1 mg, 10 mg, 2 mg, 5 mg	T1	
Tricyclics, Other Norepi-Ru Inhibitors		
amitriptyline hcl oral tablet 10 mg, 100 mg, 150 mg, 25 mg, 50 mg, 75 mg	T1	
amoxapine oral tablet 100 mg, 150 mg, 25 mg, 50 mg	T1	PA
clomipramine hcl oral capsule 25 mg, 50 mg, 75 mg	T1	
desipramine hcl oral tablet 10 mg, 100 mg, 150 mg, 25 mg, 50 mg, 75 mg	T1	
doxepin hcl oral capsule 10 mg, 100 mg, 150 mg, 25 mg, 50 mg, 75 mg	T1	
doxepin hcl oral concentrate 10 mg/ml	T1	
imipramine hcl oral tablet 10 mg, 25 mg, 50 mg	T1	
nortriptyline hcl oral capsule 10 mg, 25 mg, 50 mg, 75 mg	T1	
nortriptyline hcl oral solution 10 mg/5ml	T1	
perphenazine-amitriptyline oral tablet 2-10 mg, 2-25 mg, 4-10 mg, 4-25 mg, 4-50 mg	T1	
protriptyline hcl oral tablet 10 mg, 5 mg	T1	PA
Wakefulness-Promoting Agents		
armodafinil oral tablet 150 mg, 200 mg, 250 mg, 50 mg	T1	PA
diclofenac sodium oral tablet delayed release 75 mg	T1
